CopyChecker User Guide

The user guide provides easier user documentation of CopyChecker assignment copy checker web application. CopyChecker is one of the assignment plagiarism checking application which helps you to detect plagiarism between two assignment selected or offered by the authorized teacher. Assignment verification is the main concern here. Teachers of different subjects verify the authenticity of the selected assignment which can be on different topics before confirming the submission of the assignment. Students just submit the assignment which is asked for. When the teacher checks for the plagiarism verification the CopyChecker application checks the authenticity and shows the percentage of the similarity between two assignments or texts within default comparison. The CopyChecker application is quite faster and confirm accuracy in the algorithm part. . Therefore, the application mainly for the plagiarism detection of different subject's assignment of students by the teachers. Users may also be find guides using the following sources of information.

1. **Register**

To submit the assignments and check the authenticity of the assignments users have to register to CopyChecker as student and teacher respectively. Individual users will receive email verification after registering the CopyChecker. If users have forgotten their password, they can request a new one by entering their email address.

2. **Creating Assignment**
